

**Anna Lindh Foundation Project:**  
«Climate Change and Migration in Euro-Med Region: Socio-Economic Development and Intercultural Perspective»

**Results:**

- **Maps of International Recognition of climate migrations**, especially from the legal viewpoint and human rights, marking geographical barriers and social opportunities.
- **Case studies focused on Push Factors for “forced migration”**, about communities obliged to leave their homeland, because of climate change and specific environmental emergencies, above all in Sub-Saharan Region.
- **Case Studies concerning with Pull Factors for “migrants’ absorption”**, mainly in South European countries.
- **Good Practices for Environmental Representations and Ecological Policies in the EURO-MED Region for the Future**, where a deep sustainable change is crucial for cultural, social, economic integration into a long-term perspective.

**PARTNERS: AEJI (ISRAEL) - IMDI (ALBANIA) - FHIRD (TUNISIA) - GRF (MALTA) - UNIVERSITY OF CHIETI/PESCARA (ITALY)**

**CALL: ALF/CFP/2020/IRP/24**  
**PERIOD: 1/02/2021-15/07/2021**  
**ESTIMATED COST: 29,440 Euro**

**SCIENTIFIC COORDINATOR:**  
**Gilda Catalano, DISPES**

**UNICAL RESEARCH GROUP:**  
**Alessandra Corrado**  
**Maria Francesca D’Agostino**

**OBJECTIVES:**

- **Climate Change**, both as endogenous and global driver for many recent migration processes.
- **Nexus between the climate change and new migrations in EURO-MED Region.**

**RESEARCH WORK:**

**Observation, Analyses, Interpretation about the migration countries of departure - such as South Mediterranean Area and the destination countries as North Mediterranean and European ones – to arise the role of climate change in these specific Territories.**
